Sizes are based on the Men's Drysuit but the D1 is ideal for both male and female divers.

The D1 Hybrid is a high-end drysuit and should fit you well, and to make that happen Waterproof D1 fittings can take place at our warehouse. They are by appointment only which should be arranged through your local authorised retailer.

All sizes will be available to try on to get you the perfect fit (subject to availability).

No two bodies are the same shape, despite similarity in measurements or weight, everybody is unique. A size chart gives only a rough estimation of where to start looking.
