IMPORTANT! Size matters a lot!

Especially when it comes down to wetsuits. No two bodies are the same shape, despite similarity in measurements or weight, everybody is unique. A size chart gives only a rough estimation of where to start looking. A wetsuit should fit like a second skin, and to make that happen it should in Waterproofs opinion be mandatory to visit an authorised retailer and try on the suit to ensure a perfect fit. We advise specifically against buying from other sources, better safe than sorry, seek the support from your local retailer.
